PERSONAL STATEMENT

I'm looking to further my knowledge and understanding of human emotional experience in order to contribute meaningfully to the existing literature and progress in the direction of informing future researchers and clinical providers. I have a strong scientific mind as well as a wide-range of experience and proficiencies that help to make me a flexible and capable researcher. I plan to continue my education in the near future by pursuing study in a Ph.D. program (specifically affective neuroscience). Toward this end, I'm seeking additional experience with neuroimaging, data analysis, research design, and neuroanatomy.

EDUCATION

2001-2004.....**The University of New Hampshire**, Department of Education, Durham, NH
